Manufacturer's Declaration

DUNGS®
Combustion Controls

Scope

French regulation on mineral oils in printing inks Art. 112 Decree No. 2020-105

For many years, DUNGS has stood for quality, safety and compliance with the relevant standards and regulations.

In accordance with Article 112 of the regulation, it is confirmed that the printing inks we use do not contain any aromatic mineral oils (MOAH) and saturated mineral oils (MOSH), or only in the quantities permitted by law, which could lead to contamination of recycled materials or pose a risk to the environment and human health.

Our packaging materials comply in particular with the following specifications:

- **The content of aromatic mineral oils (MOAH) is below the limit specified in the regulation.**
- **- The content of saturated mineral oils (MOSH) is reduced to a minimum and complies with the current legal requirements.**
- **- No mineral oils are used that conflict with the requirements of the French regulation.**

We undertake to continuously monitor compliance with these regulations and, if necessary, to provide evidence of this through current analyses and test reports.
